

Fire. Art. Passion.

DaVinci Custom Fireplaces™

Introducing DaVinci Linear Custom Fireplaces™ and DaVinci Maestro™ Fireplaces

The Dean Apartments
Mountain View, CA

A real passion for fire. When you experience one of our DaVinci Custom Fireplaces,™ built exclusively at The House of Fire,™ you'll discover how every product we create reflects four decades of success delivering inspired design, long-lasting quality and the world's most engaging flames.

Kurt W. F. Rumens, President & General Manager

“Of the
original
phenomena,
light is the most
enthralling.”

Leonardo da Vinci

Our Equation for Creativity

Nine Modular Models + Six Glass Heights
+ Lengths from 2 to 66 Feet, in 1-Foot Increments
= Thousands of Configurations

We set out to redefine “custom.” We found that modularity and flexibility would be the answer to so many problems associated with typical custom fireplaces. It is a concept that allows us to continue unlocking imaginative and innovative new possibilities for any space where custom is key.

- ✓ EASILY AND EFFICIENTLY TRANSPORT EVEN OUR LARGEST FIREPLACES TO JOB SITES WITHOUT ANY SPECIAL PLANNING - NO CRANES NECESSARY
- ✓ TITAN LOCK SYSTEM™ PERMANENTLY BOLTS MULTIPLE MODULES TOGETHER ON LOCATION
- ✓ THE ABILITY TO CREATE THOUSANDS OF COMBINATIONS

Single-Sided

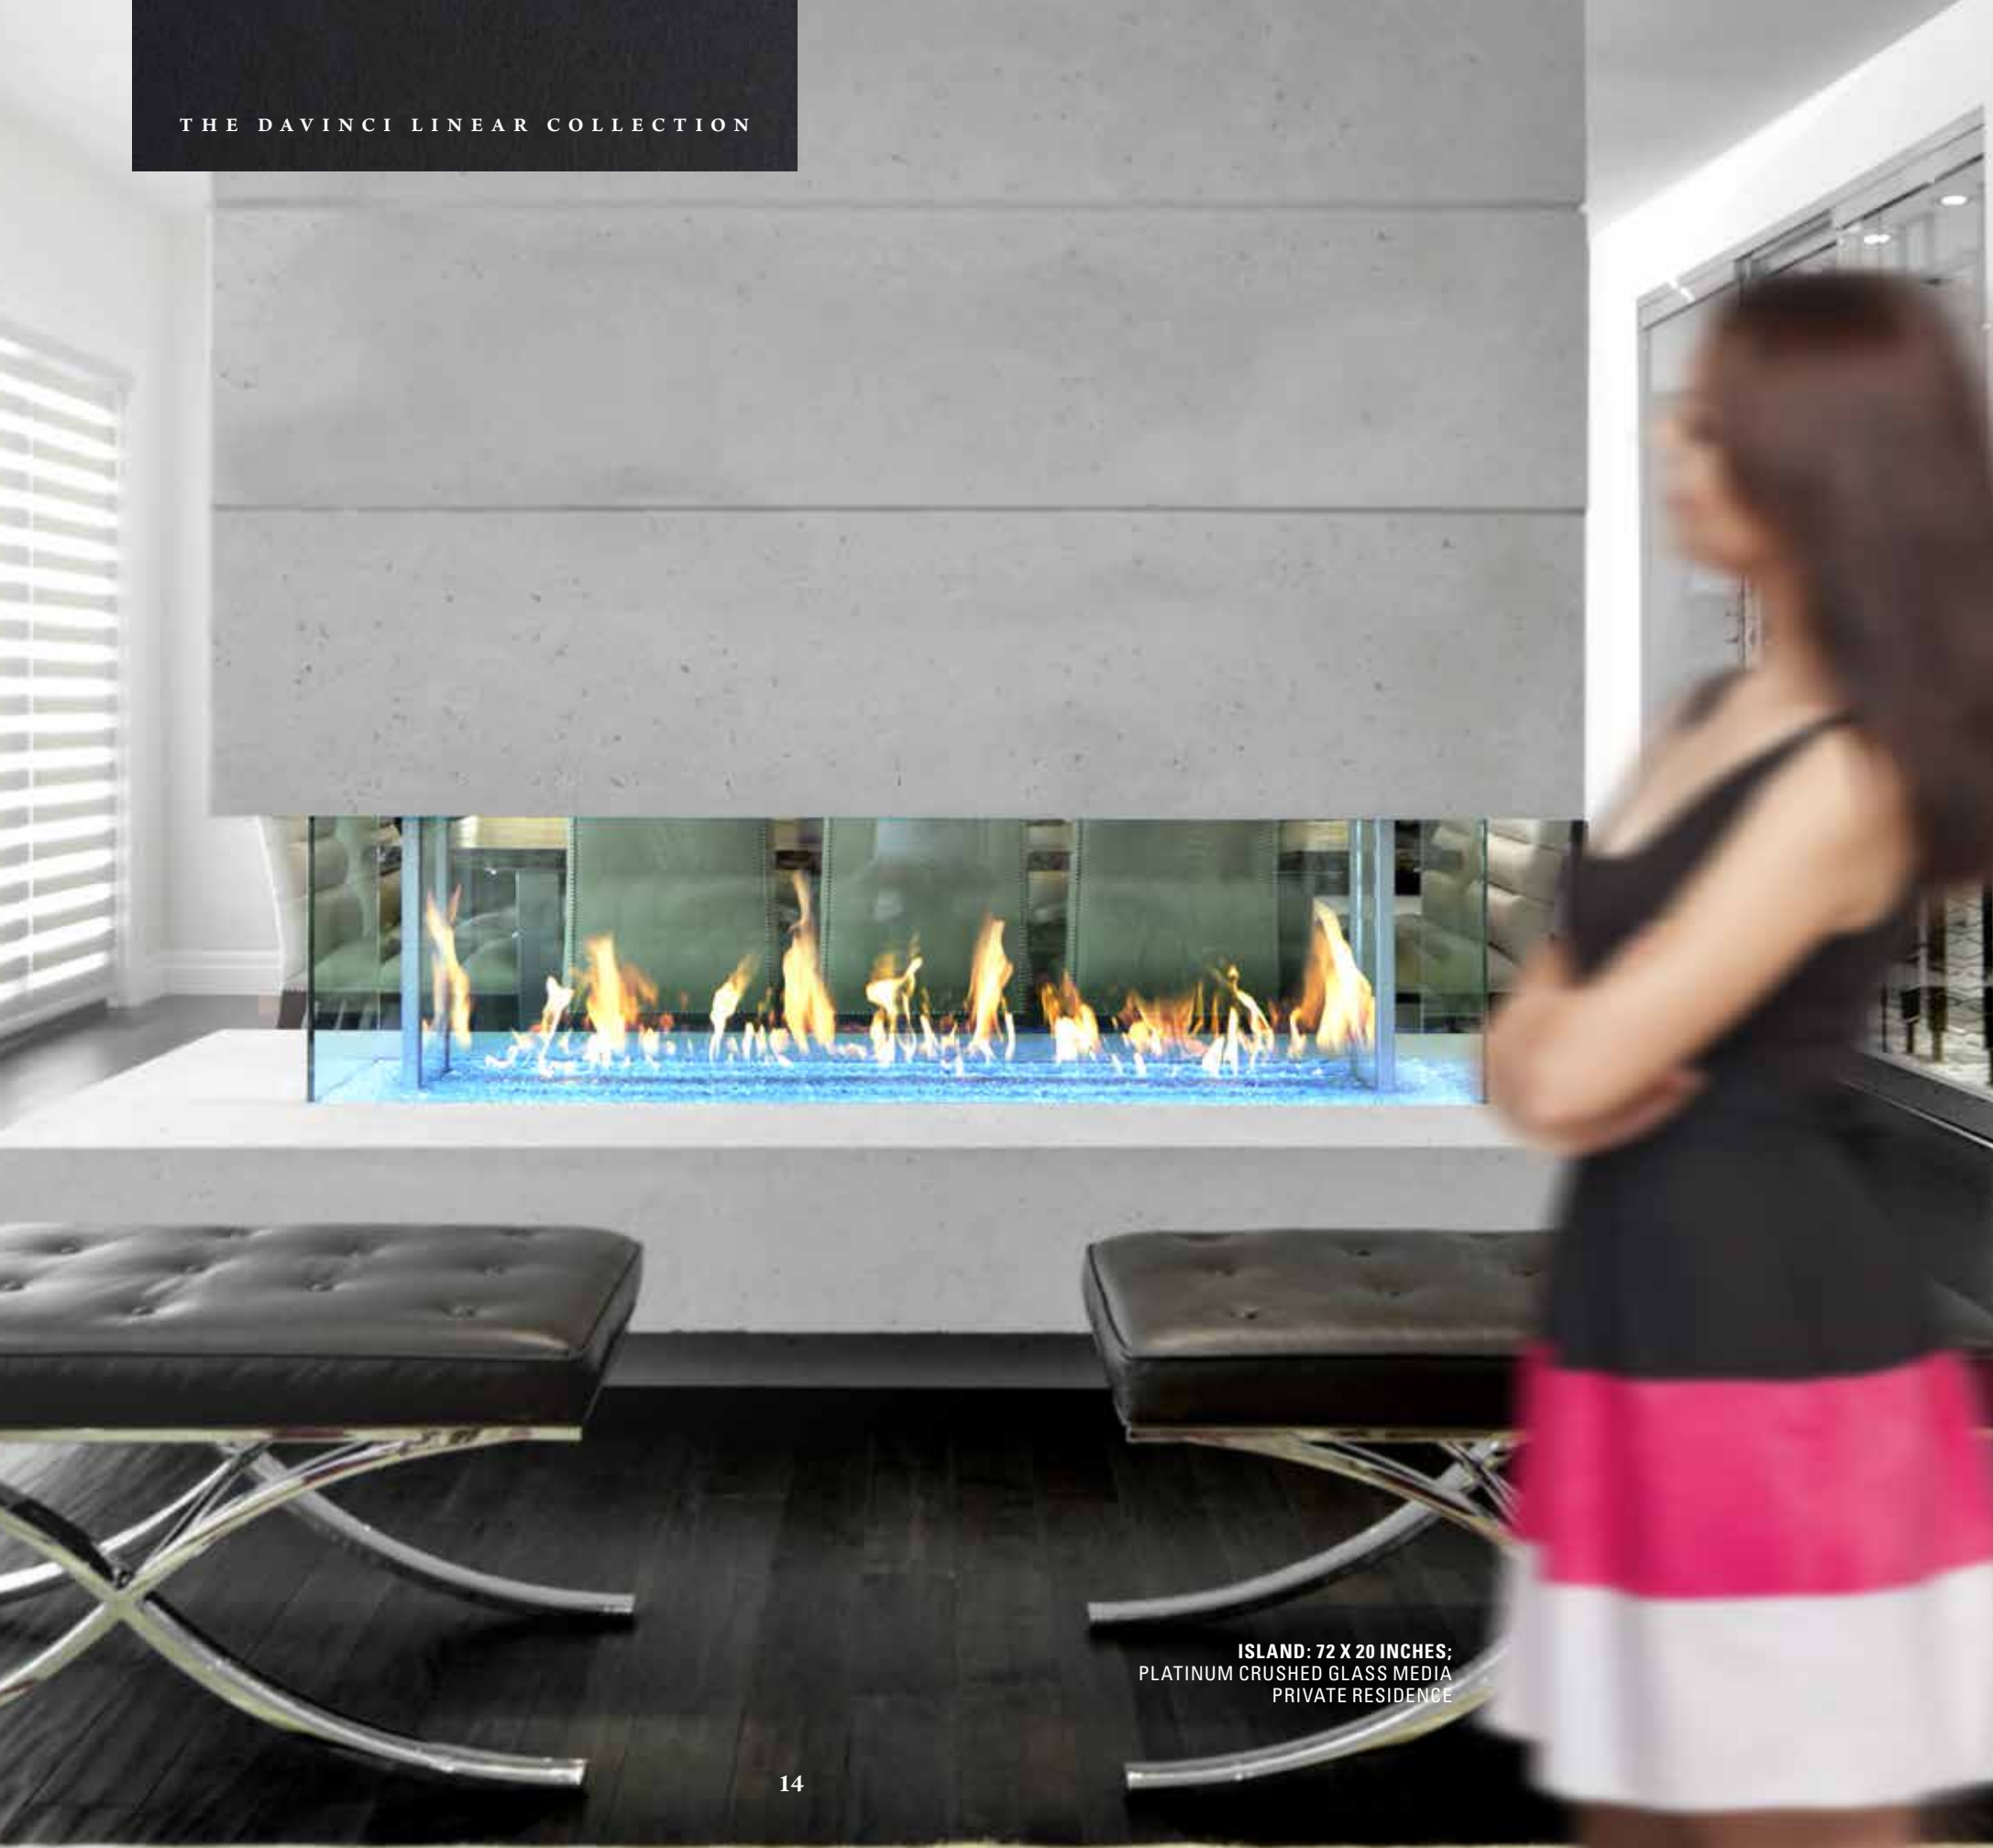

Accommodating a wide range of applications, the Single-Sided DaVinci Fireplace gives you the best fire presentation compared to any of its kind.

SINGLE-SIDED: 60 X 36 INCHES;

INNOVATIONS

A Spark of Brilliance

Modular Construction *U. S. and Foreign Patents Pending.*

The World's First Modular Fireplace

DaVinci Custom Fireplaces are available up to 66 feet long can be easily and efficiently transported and installed on the job site. Safety tested and listed prior to delivery.

Listed to: ANSI Z21.50b-2014 and CSA 2.22b-2014

DaVinci features the revolutionary, patent pending Titan Lock System™ that allows these fireplaces to be bolted together without any additional framing, wall support or machinery. No special building entries are required for these fireplaces, as they fit through normal doorways, stairwells and elevators.

1. The Leveling Track can be delivered, set and leveled ahead of time.

2. The fireplace segments are set into the track and simply slide together.

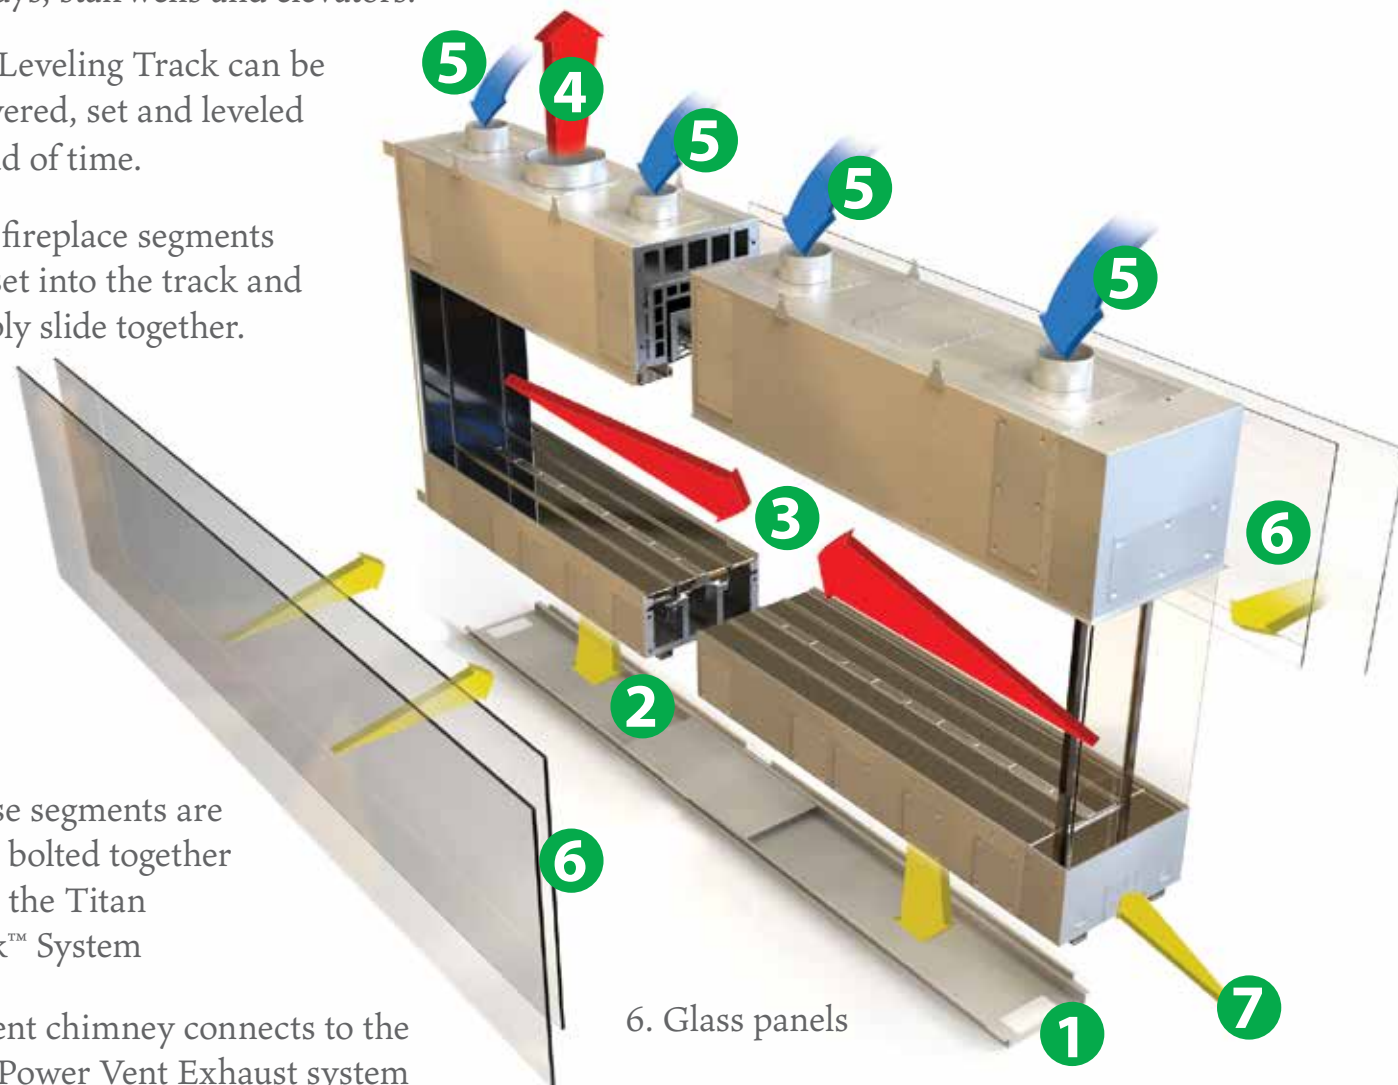

3. These segments are then bolted together with the Titan Lock™ System

4. B-Vent chimney connects to the the Power Vent Exhaust system

5. Combustion Air Intakes

6. Glass panels

7. 110 electrical and gas line connection

Safe Touch Glass™ Is the Difference You Can Feel

Crystal-clear Safe Touch Glass™—a standard feature for all DaVinci Custom Fireplaces™—eliminates the need for a protective screen and reassures that the fireplace is safe for everyone.

Zero Clearance to Combustible Surfaces

The decorative fireplace's exterior remains cool by way of the outside air that is ducted in. This eliminates the need for using expensive, non-combustible building materials and gives you the freedom to bring your finishes right up to the edge of the frame-less glass, with any building material you desire. With all DaVinci Custom Fireplaces™ you have the ability to install a TV anywhere right up to the edge of the glass, without any restrictions or mantel requirements.

Home Automation Interface

We offer a serial communication protocol to control the DaVinci Custom Fireplace™, for use with any automation system that has a serial interface.

Our DaVinci Custom Fireplaces have been installed with Lutron™, Crestron™, Savant™, and Control4™ systems.

A Dry-Contact board option is also available for simple ON/OFF switch operation.

We offer a FREE Control4™ driver, downloadable at:

www.chowmainsoft.com/davinci-control4

Elegant TouchSmart™ Wall Controls

Our uniquely streamlined fireplace designs achieve a modern look matched by our easy-to-use TouchSmart™ wall control interface. The sleek glass panel in black or white finishes, connects you to technical features that DaVinci has perfected, including a controllable heat exchanger, a 10-hour timer and full spectrum under-lit LED lighting to help set the mood. 2017 Vesta™ Award Winner for Best New Gas Appliance.

An Inspired Spectrum

Personalize your own perfect ambiance with full spectrum LED underlighting controlled via TouchSmart™. Davinci Custom Fireplaces™ also feature overhead halogen lighting to highlight the beauty of your fireplace even when it isn't lit.

COLLECTION™

Select Fyre-Art™ for a More Stunning Presentation

Transform the overall look of your DaVinci Collection fireplace with Fyre-Art.™ Inspired by real elements of nature, our handcrafted Fyre-Art™ options include traditional logs, driftwood, and time-worn stones to offer the most detailed and realistic media available anywhere.

TRADITIONAL LOGS

DRIFTWOOD LOGS

TWIGS & STONES

BIRCH LOGS

TUMBLLED STONE

Handmade Artisan Trims from Our Custom Shop

Impressive IronWorks™ trims are hand-hammered heavy-gauge steel individually by the blacksmiths at our in-house custom shop. These creations feature hammered, textured surfaces and intricate detailing, available in Bronze Patina or Burnished Patina with finishes that are hand-applied and absorbed deep into the metal, imparting a rich luster and a timeless look.

Choice of Liners (Required)

These contemporary liners provide a dramatic backdrop to the dancing flames of your DaVinci.

Black Paint Finish

Silver Paint Finish

Black Enamel

Black Glass

Post-less Design

Most of our fireplaces feature a post-less design for the appearance of a clean, glass-to-glass edge and unobstructed viewing area. Available on Right Corner, Left Corner, Bay and Pier designs.

Heat Exchanger Kit

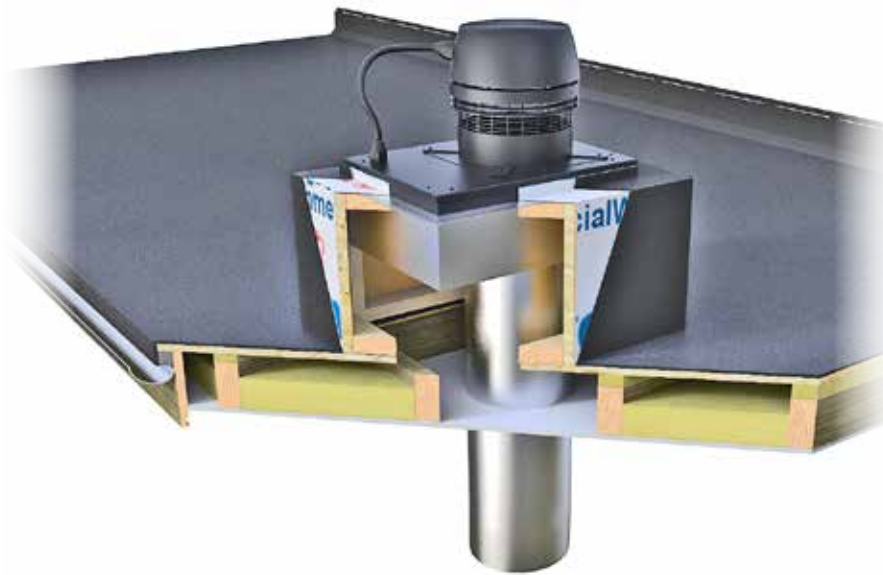

While DaVinci Custom Fireplaces are primarily designed as a non-heating appliance, there are occasions where heat is desired.

DaVinci Custom Fireplaces makes a heat exchanger add-on option that allows you to vent heat in the room where the fireplace is located, or into a nearby location within the building.

The heat exchanger is not currently available for Bay and Island fireplaces.

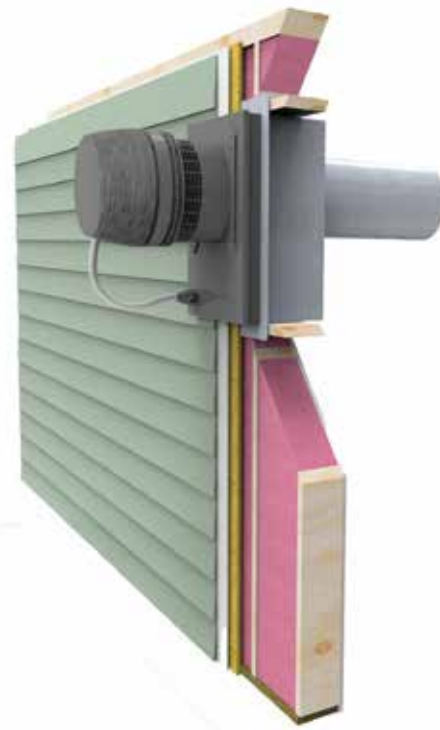

Venting - Vertical or Horizontal

All DaVinci Custom Fireplaces are power vented. A quiet power vent system pulls combustion air into and around the fireplace while at the same time pushing combustion gases through the exhaust vent and out of the building. This system solves all venting challenges and accommodates vent runs up to 150 feet long or six feet below the unit, allowing you to install a DaVinci anywhere you can imagine.

Vertically Terminated Power Exhaust Fan

Check with your local building codes for snow pack height requirements.

Horizontally Terminated Power Exhaust Fan

Fan motor is installed on the exterior of the structure. Allows easy access for service

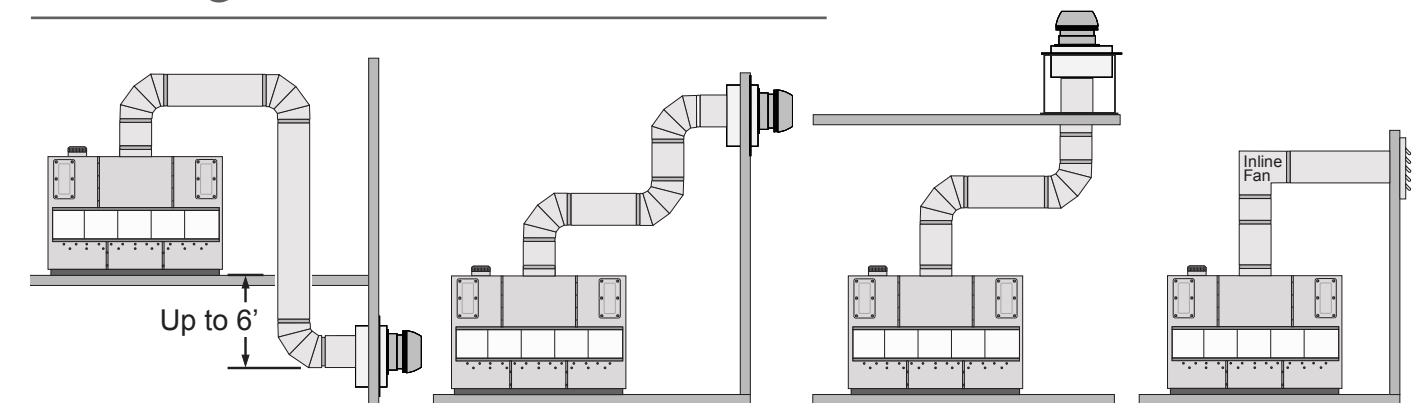

Inline Power Exhaust Fan

For a clean look on the outside of the structure, a horizontal Inline Power Exhaust Fan is available with louvered termination.

You must allow fan access plate within the structure for service

Virtually Unlimited Vent Configurations

The Power Vent system on the DaVinci Custom Fireplace allows for nearly limitless venting configurations, even in the most challenging building situations. Approved for venting runs up to 100 feet vertical and 100 feet horizontal.

BUILT TO BE BETTER
In Every Way

Every DaVinci Custom Fireplace™ is thoughtfully imagined to become the focal point of a room, but only with the idea that beauty must be matched with easy integration. Our products are created so that architects, designers and builders can bypass the most complicated problems that accompany one-off models. In fact our lead times are only 4 to 6 weeks, which is half of the custom fireplace industry standard. We also deliver myriad options and styling configurations that help to make what you build a truly unique masterpiece.

**WE INVITE YOU
TO COLLABORATE WITH
US ON YOUR PROJECT**
